Category:AutodeskQ: Why are the first 3 questions in this site closed?  
Can someone explain to me what the policy is about closing the first 3 questions in the reputation history page. I am using the StackExchange App which I am trying to start my own account with, but when I opened this page: I am getting the following

---

page: And when I clicked on the link the page went to this page: Do I have to wait some time to get the reputation, or is there something else going on? A: Yes, you need to wait.

The reputation on the first page is affected by two different systems, one is the normal earned reputation, and the other is the "limited profile" one which is only available for the first 3 questions of the day, and resets everytime a question is posted.

---

That is why the first page of reputation is so low. SAN FRANCISCO (MarketWatch) — Stocks wobbled Thursday, with the Dow and S&P 500 off more than a point and the Nasdaq off 0.7%. That was following the Federal Reserve's confirmation that it will extend its bond-buying stimulus program. The FOMC voted Wednesday to buy \$

Abortion and the abortion debate have captured the attention of many in the past two years, and for good reason. The number of abortions

---

performed in the U.S. reached its lowest point in nearly 40 years in 2016, falling to 15.6 million. That number includes both legal and illegal abortions, and represents a 41% decline from the prior year. The data, just released by the Centers for Disease Control and Prevention, come from reports of federally funded clinics and private practitioners. I am in the business of reporting on the abortion debate, and

---

I have often been accused of being anti-abortion. But I am not. I think all abortions should be legal, and I think women should have the right to choose, provided they are truly informed. Abortion is one of the most divisive issues in America. In some states, it is the most divisive issue. Forty years ago, the average abortion rate was 20 per 1,000 women of childbearing age. Today, it is 15.6. The decline has not been

---

driven by more women having abortions. In fact, the rate fell when the number of abortions actually increased, by 4.4% in the period from 2008 to 2016. It also hasn't been driven by women obtaining abortions later in pregnancy. The number of abortions performed after 21 weeks of gestation increased from a low of 24,000 in 2007 to 33,000 in 2014. The decrease in the abortion rate is driven by more restrictions on

---

abortions, driven by state after state, from a low of 26 in 2013 to a low of just 17 in 2016. And if that were not bad enough, the decline was spurred on by state laws that strip women of reproductive rights. If that doesn't

This invention relates generally to business transaction methods, systems, and processes, and more specifically, to improvements in business transaction systems and methods that have a common payment card issuing entity and common funding source.

---

Although the systems and processes of the business transaction industry and that of banking have important differences, the core funding of an operating account of a bank from a central funding source to a particular individual or account, and the use of a bank card, either a credit card or debit card, to facilitate the transfer of funds from the central funding source to an individual or an account in a business transaction are similar.

---

For example, a credit card may be used as payment for goods and services in place of cash or check, and a bank account
