I have a drop down in the.php page where the user can select the category to edit/ delete it. I am using jquery to detect when the user select the category and show some text below it. The problem is that when the user selects another category(and the selected value is displayed) the old value remains in the drop down. HTML:

---

I'm trying to make a div scroll independently of a webpage, as if it was it's own webpage (not even inside a containing div). What am I doing wrong? `body { margin: 0; } .container { width: 1000px; height: 300px; background-color: black; } .content { background-color: white; width: 100%; height: 100%; overflow-y: auto; overflow-x: hidden; } More Content A:` By default, a container doesn't have an overflow, so you'll need to add `overflow-x: scroll` to be able to see all of the child content, if you want to scroll through the container on the x-axis and keep the container itself static. `body { margin: 0; } .container { width: 1000px; height: 300px; background`
