Zombie Nest is an Offline Survival game you play in Sandbox Mode, Without the internet/server connection, you can play with your friends on the same Wi-Fi or VNC. Use the Survival Game Menu to start games, the Multiplayer view to join matches, the Quick Play view to quickly join a session without playing, and the Map View to help you find more matches. Those are the four views you can use to participate in games. As for now, there are only three game modes, solo, team, and with friends. If you want to start with zombie survival, I strongly recommend Zombie Nest. If you want to play zombie survival along with friends, as a team, I recommend Zombie Nest. Let’s start playing. Click the Start button at the bottom of the screen to start the game. If you want to play with your friends, choose the multiplayer view in the game menu. If you want to start a game with your friends, choose Quick Play from the game menu to quickly join a game. Let's play! Choose the Map view to view the map. There is a map but no map will be shown if there is no player on the server, so make sure you set your game in Sandbox Mode to avoid losing anything. Change your IP If your server is different from yours, you may have to change your IP address. You can also change your IP address by going to from your computer. Auto-Server You can also chose to auto-connect to a server whenever you start the game. What's new:

Soulbound

The protagonist, Dorcas, repeatedly recalls the name of a person she has lost love for. He appeared to be a person with a strong sense of justice and with a deep love for things of the gods. Of course, it is a lie. The person her recall is actually the girl she has lost love for.

This is Soulbound.

Soulbound is an action game developed by Famo Games, the team behind Omizu+Zombie. It is based on the historical game Omizu Zombie ++. In order to complete the game, you'll need a secret password which is only available for download. By the time you read this review, a certain time limit will likely have passed in which you'll be unable to access the password. In that case, there will be a special postscript.
