**Power Tools for Photoshop** As with most programs, there are plenty of tools and features in Photoshop to enhance your experience. They are all accessible via the Help menu. \* The **Pencil** tool is used for making precise edits and drawing freeform lines that can be moved, rotated, and scaled. Figure 2.15A shows how you can draw an oval with a few quick strokes. \* The **Paint Bucket** tool is used to fill images with a single color or to duplicate layers with the color you select. You can move freely around an image with this tool. Figure 2.15B shows the tool's dialog box. \* The **Eraser** tool allows you to paint over an area by moving a brush over it, erasing areas with it, or creating fine lines. You can use the inverse mode (a thin line creating a solid area) to draw borders or get rid of seams between layers. Figure 2.15C shows an example. \* The **Rectangle** tool enables you to create a rectangular selection with a click of a mouse. Figure 2.15D shows the tool in action. \* The **Magic Wand** tool enables you to select a rectangular area of pixels using either the brush or color chips found in the dialog box. These color chips can be moved and adjusted to paint color directly over any colors found on the image. Figure 2.15E shows the tool in action. \* The **Add to Selection** tool is used to select all of the pixels on an image similar to the way the Magic Wand tool works. This tool has multiple advantages that include accurately selecting overlapping or adjacent objects and painting directly over those objects. Figure 2.15F shows the dialog box you'll use if you use this tool.

Hopes of averting an all-out war in the Crimea seem slim amid a series of military clashes between Ukraine and Russia, with the Kremlin saying it is “more than ready for war,” as Russia's military chief said Russia has been ready to deploy nuclear weapons to stop an “anarchy” in Ukraine. The crisis began Tuesday after Ukraine's parliament voted to strip its Russian-backed president of his powers and Kyiv sent in tanks to quell pro-Moscow protests. The interim government has since sent troops to Crimea, a Black Sea peninsula that is home to a majority Russian-speaking population, amid fears of Russian invasion. Though tensions have been running high in Crimea, Russia has said it will only take direct military action if Ukrainians move troops across the border. However, Moscow warned it would not allow foreign countries to get involved militarily. “You can't just put Nato troops on our borders, and you can't just put the United States and NATO troops on our borders,” Russian Defense Minister Sergey Shoygu said in an interview with Moscow's Rossiya-24 television channel. “In case of an anarchy, that would be a direct threat to the lives of millions of people. In that situation, I'm telling you, the situation in Crimea will become an international problem.” In a sign of the high-stakes nature of the standoff, Moscow announced Wednesday it will hold military exercises in the country next week in which it will deploy an unspecified number of troops to what it called “the south part of the Russian Federation.” The announcement marks the first time that Moscow has publicly acknowledged the troops are in Crimea. The troop movements will take place on the same day that Ukraine's military says it will stop a Russian convoy from crossing into Crimea and will soon move to the peninsula. One of the Russian trucks is reportedly carrying 400 tonnes of equipment, including armored personnel carriers and ammunition. In an interview with CNN on Wednesday, Crimea's Russian speaker Sergey Aksenov, who owns a boat-building business and has closely followed the events in the region, said the trucks were carrying construction material. “This is a provocation - it is not a real convoy,” Aksenov told CNN's Christiane Amanpour. “They are making propaganda against Russia.” Ukraine's Defense Ministry said that it would soon “intercept” the truck
