Epic Hero Battles is a free-to-play multiplayer brawler with cards, and a peaceful and colorful casual environment where players of all skill levels can have a fun-filled, no-frills experience. In this game, cards and the different heroes you play, where they appear, have been prepared with an experience system. Your characters are going to grow in skills, stats and levels.

Rivals of Aether is a free-to-play multiplayer shooter where you and your friends duel one another with cards. Show them who is the most powerful! Rivals of Aether gameplay is divided into 3 types: Tutorials, Challenges and Duels. The tutorial section is very easy to understand. The challenges are a little bit more difficult and are intended to help improve your gameplay. The duels are for people that want to take on others. You will be given a deck that you have to play with, and you will be fighting against opponents with their own decks. You will be able to choose between 2 classes of warriors: Cabalists and Kraggs. The Cabalists are magical and deal a lot of damage. The Kraggs are physical. They are medium strong and fight defensively. You can evolve your deck over time to suit your own style and preference. There are no classes in the game. Instead of classes, you have heroes that each come with a set of cards that they can use in duels. If you make a lot of mistakes in a duel, you will not gain any rewards. It does not matter if you win or lose. However, the more duels that you win, the more card packs you will earn. Colors feature a ton of particles. The graphics are crisp and sharp. They are aimed to give the players a nice variety of colors and images. The sound effects are good. It has nice background sounds that you hear when you leave or arrive at the different points of the game. The game is visually and audio-wise very polished. There are not really any annoying bugs. The game has a lot of features: Multiplayer, a challenge mode, the Social Hub, and daily/weekly competitions. Furthermore,

there are several unlockable cards, skins, leaderboards, and achievements. There are no microtransactions or other such shady activities in Epic Hero Battles. HOW TO PLAY? The Tutorial is very easy to understand, and it will tell you how to control the game, and which key you can use to move. In Epic Hero Battles

PartyLine VR Features Key:

Customized Stripes

The match's color scheme can be customized to your liking. Pick one of the 16 customizable color schemes, and the strip color will be optimized for that color scheme.

Set Score Limits

By specifying the upper and lower score values, the game will stall when the score reaches a certain point. The game ends when the max score value is reached.

Chase and avoid baddies as much as you like

If you aren't careful, you could be stopped by an enemy and lose some of your points. Dodge baddies when they're coming straight at you, and lead your baddies after they have cornered you!

What is it about?

Slymes is a turn based strategy battle game which has you maneuvering baddies to set up scores! I'm hoping to create a sense of tension by hitting your baddies with spikes & bullets and sending them into dark caverns, rivers, and onto spikes.

Anything else?

It's early on in development. Would be really interested in any constructive criticism you have regarding the project. Also, feel free to drop me a line at prt1el.com.
