**Eight years ago, in a small island, the greatest army of the world was born. Since then the Space Empire has conquered almost all lands of the world. There were just two lands left. The first of them - Great Kattalunga. And you as a wise king are leading the fight to save the whole world. Quickly gather allies, build your military, create a great army and attack with fire a big kingdom. A 3D'space shooter' / strategy game which tells the story of the**

**survival and growth of mankind. It is a very fast paced game with a lot of features and map sizes. The game also has an option to choose different time periods for your play through. In battle, you can watch all enemies from a top-down view, and control the progress of the battle with the mouse. You can use bombs to attack or defend, and you can use a single-use cannon to damage the enemy or do damage to friendly units. To capture enemy units, you can use a Sword or Bow. In the warp you can upgrade your units using materials from defeated enemies. The default map is for 20 or 200 minutes play time. You can change the map for any longer time. The longer the time, the more material will be given. When you defeat an enemy, they are captured in the enemy village. You can start a new game and resume from the same village if you want to. The resources are regenerated over time and after the capture of 10 or more enemy units the captain of the village will bring resources to the village. If you want to play single player mode, you can join the army of the Big Boss's Son, by changing his name. You can improve your characters with items you get from enemies. Items can be strengthened and skills unlocked by the use of points. You will find it easy to increase the points by defeating enemies. The game plays quite well on the most of computers. MordaxTech are very enthusiastic for this game. You can find it here: [Getting it to work on a 32 bit Windows machine may require some ingenuity \(see appendix\)](#). **published:21 Mar 2017 views:3970 back Jigsaw Puzzle of the Day #11: Matching Italian Hats** The video today shows a matching jigsaw puzzle game one of the designer's favorite subjects, Italian HATS. I found some nice examples of reproductions of Italian hats, and I made a lot of jigsaws with these pieces. In fact, I managed to make 12 jigsaws with one complete Italian hat! I hope you liked this video by Google+ and I wish you good luck to your jigsaw puzzles! Please, give it a thumbs up if you appreciate it! In fact, I'm still building jigsaws with these pieces and I will show them in the next days. Thanks for watching! **Guard Lance/Vanguard Fitting Balance to Melee DPS RK Even though DPS fitting is important, another often neglected aspect is tank fitting. The RG wielding Paragon Axe in Torment 1 gives me some confidence that we can take on Elite Guards. I want to refer to a few current builds in order to determine how many of the Global DPS offers in the earlier tiers are viable across all armor types. We see a few builds out there that are viable only at full PvP stats. Take the below build for example: Build: Support: HP/Regen/Dodge/Thermal Nova Build: Tank: Common Guard Lance/Vanguard Pros/Cons Pros Misfit based tanking out of corners for RK with almost no XP gain or usage of EW bash (I may be wrong!) Viable even with low gear stats Cons Not an overkill tank for support, as Scout is the only required support gear and we do not have faith in our team's firepower. If we consider the attachment being global, there is no requirement on the tank therefore low success rate in PUGs. Overall, I feel this is a non-viable build at this time.**

---

**When comes to Support, we see a decent amount of builds at this time in most of the areas. Remember that the attachments we use on support change the schematic over time, so if you want to try out potential builds, pay attention. Provided the 2 Global DPS I cited earlier, let's be more modest and say the following access points: Build: Support: HP/Regen/Dodge/Thermal Nova Build: Tank: Elite Guard Lance/Vanguard Pros/Cons Pros Fit based tanking, with very low number of stat requirements The minimum augments are for survivability Cons Requires spike usage of EW dmg especially against Elite Guards with high shield Not an overkill tank for support, as Scout is the only required support gear and we do not have faith in our team's firepower. The Buffeteer Portal Perk can act like whirlwind. Overall, there is a viability this time. However I will be not push for the provided build too much, as for our team's damage output, we do not have that and require some parts if we are to be viable.**
