WWE Raw Ultimate Impact 2012 Full Version Free Download.Q: How to Find out the Iteration Run in Jmeter Script Recorders using JSR223 Sampler with variable name? I am using JSR223 Sampler to record the Iteration in JMeter Script Recorder. For doing this I have changed the variable name as iterationNumber. The variable name having in start-group in second line to record the iteration, as shown in the below code. //Start group iterationNumber = vars.get("iterationNumber"); //End group After that I am recording the Start and End of each iteration in the separate file for each iteration. For each iteration, I want to find out the number of iteration run that I am recording in a file for each iteration separately. How to find it out? A: Check prev.iteration. prev = vars.get("prev.iteration") prev.iteration is the iteration which comes at the beginning of the previous Sampler. Let's take a scenario: sampler A records the number of iteration sampler B records the start/end of the iteration So the prev.iteration will point to sampler A, and vars.get("prev.iteration") will return the value of iterationNumber from sampler A. If you are only interested in the number of iteration, I suggest you to use a regular expression
