This test tries to determine your personality traits and place you on the political spectrum. You are asked 36 questions about morality and morals, and are offered three choices for each answer. If you choose one or more wrong answers, it probably shows that you may be living in a world without morals. Not only does the test allow you to answer the questions, but it also allows you to tell us a little bit about you.

sepsis, as encephalopathy and sepsis were the triggering factors. Colonic perforation can occur in the presence of other major surgical conditions. We found only one other report of postcholecystectomy colonic perforation \[[@B13]\]. Eight months after the cholecystectomy, the patient underwent liver transplantation for sclerosing cholangitis and died 11 months after the liver transplantation. The cause of

death was multiple organ failure, which was attributed to the underlying hepatic disease and septic shock. Combining extensive laparoscopic experience, knowledge about potential surgical complications, and prompt recognition and treatment, a laparoscopic approach can be safely and effectively performed even in elderly patients. We believe that our case demonstrates the feasibility of laparoscopic

management in elderly patients
with a perforated colon.
