
Napoleon Total War 1.3 English Language Pack Extra Quality

a total war saga: the battle of magersfontein is a historical total conversion mod for total war: rome 2. it recreates the battle of magersfontein, one of the last major battles of the anglo-zulu war in which the south african forces of the zulu nation fought a small contingent of british colonial troops led by lieutenant-general sir george colley, and the zulu nation. the mod introduces many new units and features such as new armies, new generals, new leaders, new diplomacy, new maps, new visual effects, new sounds and much more. this mod represents the first and only total war campaign set in the african colonies. we're starting with a class you've already experienced in total war: warhammer, the archer. though by no means is the new variety of ranged troops an outright replacement for the current line, they do do some interesting things. the faster speed and higher movement combined with the ability to fire from the back of your unit means that archers now fit into the same framework as the other ranged units. although it's very rare for us to be positively enthusiastic about modding, we've been particularly excited to see what has been achieved by the modders of the game of thrones mod. a free mod released in 2017, game of thrones is a total conversion mod that recreates the world of a song of ice and fire in a medieval theme. game of thrones includes new factions, houses, and a huge number of quests. dragons and spells have also been added to the game. in the ai, we've added a new, smarter ai house as well as an ai house that includes the grey cells we've learnt from this year's community flavor pack. there are also six new character traits for rulers.
