However, I feel the beta version is not quite refined compared to the current version of the application in terms of creating PDF files and editing text. When I first opened the app, I tried to download a book from the website. I was informed that I do not have a book in my library that is compatible with the app. So I was forced to use this app as a PDF converter. The conversion features are spot on; I was able to add notes to each book, as well as decrease the margins and margins in between paragraphs. I am fairly familiar with computers and Android apps; however, when I first opened the app, I could not convert my downloaded PDF books onto my kindle. I was able to do this once I realized that I needed to download the Kindle app. The Kindle app downloaded along with the application and I was able to download the books from the Kindle website and then download them to the application.
