Now, all you need to do is select the image you'd like to tweak, and it'll be better than you can get using any other piece of editing software - much deeper levels of adjustment than most desktop color controls are capable of. And, as in Lightroom, Exposure is also included here, as well as Shadows and Highlights. For those who like it blue, however, Color Curves can also go nuts, adjusting all the color and black levels to achieve a photo look like it was taken in the 1980s.
