The studio was formed by four employees of Empire Interactive and is based in St Albans, Hertfordshire, U.K. What makes Bungie Studios unique is they are all in their 20s and 30s. They have worked at a variety of studios over the years. The studio started out as a part of Empire Interactive, a game company that created U.S. Gold, a licensed game based on the Home Alone franchise. U.S. Gold was designed to help Sega widen the audience for its Sonic the Hedgehog franchise. In an effort to compete with other game studios, Empire Interactive built the next year's Mortal Kombat and Quest for Glory. In their first three years, the company introduced three very successful games: Half-Life, Doom and Quake. The games were well received, and Empire Interactive was almost profitable. In 1997, however, Empire Interactive released two ill-fated games, Interstate '76 and I Accentuate the Positive. Both games failed commercially. In 1998, Empire Interactive closed its doors and Left 4 Dead took over the recently created studio. The studio's first project, Blood, was a solid product that helped a struggling competitor, THQ, return to profitability. Unfortunately, Left 4 Dead didn't meet sales expectations. THQ fired the studio's executive producer and Left 4 Dead 2 was pushed back to the following year. In the meantime, Left 4 Dead also failed to meet sales expectations. In 2000, THQ formed a smaller, more focused studio that would work on Left 4 Dead. The result, surprisingly, was a success. By 2001, Left 4 Dead had reached cult status and THQ was able to do a series of acquisitions and begin developing future titles for the game. 2004 saw the release of Team Fortress 2, the game that proved to the general public that Valve and the Half-Life universe are an acceptable commercial investment. The game was also a commercial success. By 2005, Half-Life 2 had shipped more than six million copies. In February 2005, Valve purchased the company from THQ, and with Valve now having its own developer house and an existing portfolio of games, the Halo franchise was once again its major franchise. In 2013, the studio released Halo: Combat Evolved Anniversary, which received good reviews. It was followed in 2014 with Halo 4, which received critical acclaim and commercial success. In November 2014, Bungie staff announced they were leaving the studio
