A 19-year-old college student from Sarasota was stabbed to death in a turf dispute with a 19-year-old Monroe man, a local sheriff's spokesman said. A dispute between the two men escalated into a violent confrontation about 7:30 p.m. Monday, according to the Florida Department of Law Enforcement, which is investigating the slaying of Tyler Jay Curtis. Curtis was stabbed in the chest and stomach and died at Sarasota Memorial Hospital shortly afterward. When FDLE investigators arrived at the

scene, they found a second victim, a 19-year-old woman from Charlotte, N.C., who was also involved in the altercation. Her injuries were not life-threatening, and she was taken to Sarasota Memorial Hospital for treatment. Police at the scene identified the two men involved as Zachary Parker, 19, and Curtis, according to the sheriff's office. The stabbing was not a random act, said Sheriff's Office spokesman J.D. Patterson. Both men lived in the home at the location of the stabbing. "This is obviously a tragic situation," Patterson said. "We do believe there was a struggle in the backyard of this home and then this altercation escalated." It is unclear what precipitated the violence, Patterson said, adding that both men were taken into custody for questioning, but he said the two were not involved in a romantic relationship.

A powerful utility for creating and using macros that permit you to cut or copy graphics, text, and a wide variety of objects and data from one document to another. The program supports all the most recent versions of the standard Windows operating systems. It is available as an executable file that can be downloaded on the official website. In order to use the program, you need to install it, after which you will be able to add a couple of tasks to the macro list. You can also configure the various parameters, including the icons and text styles. Macros can be stored in different formats, which gives the option of choosing the one you prefer. As far as file formats are concerned, the programs supports .MAC, .MACB, .MACM,

and.MACR. You can use the program to cut any object from an existing document, to create a new document from a template, or to do numerous other things. Plus, it allows you to drag and drop your macro list from the main window into any destination document. The program supports the "Add to list" and "Add to inventory" features, which make it easy to create a wide variety of tasks. The latter makes it possible to save the objects you have created in the macro list, whereas the former lets you assign a name to your creation. In any case, the selected task can be copied or cut from the list. There is also support for the following actions: copy text, copy graphics, insert text, insert graphics, cut, copy, paste, delete, paste text, paste graphics, cut, resize, crop, print, rotate, stamp, email, change font, change size, and change color. Some

of the most important features of the program include the following: you can create a new document in the chosen format from a template, change the default values, save the selection list, and save the task list to a.txt file. Some of the most common features that you can configure in the application are as follows: you can change the format of the command line interface, select the default font, set the default color, choose the icon type, and modify the input and output directories. Keynotes: - Color of all the components can be changed. - Configuration file can be edited and saved in a file. - All the entries and their properties can be edited. - A clear demonstration of the menu on a demonstration video. 2edc1e01e8
