#### What's New in the SysTools AddPST?

SysTools AddPST is a handy and useful application designed to provide users with a simple means of adding multiple PST files to Outlook. The application provides you with the possibility of importing PST files either from different system locations or from one folder which contains multiple PST files. Important: This tool is just for importing/addition of PST files, not for backup. What's new in this version: Improved Bug fixes SysTools AddPST Requirements: Windows 2000/XP/2003/Vista SysTools AddPST Installation Guide: Download and install the trial version of the software and then extract it to your hard disk. The trial version of the software comes with a free 30-day trial period. After that period, you will need to purchase the full version of the program. To install the full version, click on the setup file to run the setup program. A page will open and you will have to enter the information required to install the software. When you are asked whether you want to allow Windows to install the program, simply click Yes. Note: In this case, Windows will download the latest version of the software. You will have to pay \$39 to get the full version of the software. Follow the on-screen instructions to complete the installation. You will then need to restart your computer. SysTools AddPST will now be installed on your computer and ready to use. SysTools AddPST is very easy to use and when you open it, you will see that you can import multiple PST files in a single operation. You will see a popup window asking you to enter the PST file location. To import a new PST file, simply press the Import button. A new import window will open in which you can select the locations you want to import the files into. You can import PST files from the default location (Windows\system32), from a specific location or from the Documents folder. Once you have selected the locations you want to import into, click on the OK button. Note: You can also drag and drop the PST files into the import window. A new dialog box will open in which you will be prompted to enter the location of the imported PST file. Note: This location will be the default location for the file when it is imported. Simply press the Next button to continue. You will then be prompted to enter the folder in which you want to export the files. Note: This folder will be the default location for

the exported PST file. Simply press the Next button to continue. You will then be prompted to enter the location of the source folder containing the multiple PST files. Note: This location will be the

Adobe Flash Player 10.3 or later is required to play online. To install, download and install the latest version of Flash Player. If Flash Player is not installed on your computer, you can download it from the Adobe website. Mac System Requirements: Mac OS X v10.6 Snow Leopard or later Intel i5 processor 2 GB RAM 1024 x 768 display or better If you do not have the necessary graphics hardware, you can run the client on a simulated graphics
